Care instructions

In order to enjoy your garden furniture for a long time, we recommend that you store them in a dry place when it rains and during the winter season.

Aluminium

Aluminium is ideal for outdoor furniture because of its unique properties.

It has a high level of stability despite its low weight. In addition, aluminium is weatherproof, rustproof, heat-resistant, easy to care for and recyclable.

Dirt and deposits may form on the material due to weather influences.

They can be easily removed with a cloth or a soft brush and a little water.

We recommend that you treat the paintwork every six months with colourless car polish (do not apply by machine) to protect it. This treatment extends the life of the paint and makes it easier to remove dirt and build-up.

Products based on imitation wood (WPC)

Use a damp cloth to clean the imitation wood.

Do not use sharp objects or aggressive cleaning agents for cleaning.

Safety warnings: Two-person lifting

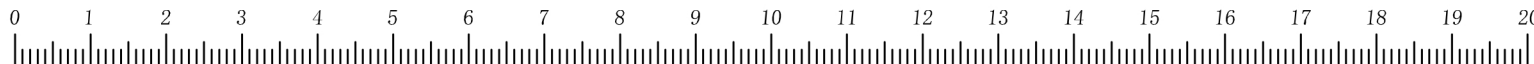

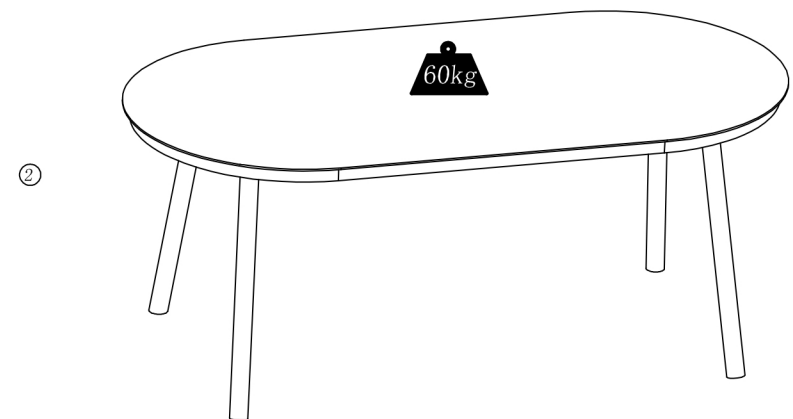

/ Handcart transportation
